

The Working Groups (Groupes de Travail et de Réflexion - GTR )are meeting and exchange places between specialists and experts who wish to deepen some subjects and bring concrete answers to their concerns of risk mastering and dependability in their specialties.

The GTR allow to compare approaches and thoughts of manufacturers, academics and all companies members of IMdR. They deal with various topics (technical field, human factor, organizational factor, economic aspects...) and decide themselves of their agenda and objectives. They even may publish their works.

Every IMdR member may propose a group creation or join one existing group by contact with IMdR or directly a GTR animator.

GTR chairman: M. Jean-Marc CAVEDON / [president\\_gtr@imdr.eu](mailto:president_gtr@imdr.eu)
